EXPERIENCE

Senior Engineer (Web Engineering) — *Slalom Build*

March 2019 - Present

Transitioned to Slalom Build, the engineering agency within Slalom, to focus on frontend engineering, specializing in CMS systems, headless architecture and modern web technologies.

Key Project Highlight: 17 months with an insurance + fintech company, working on a major data and cloud modernization project

- Helped develop an internal client-facing UI using React.js, SCSS, and Material UI
- Worked in agile sprints, focusing on features, both building out new features and reusable components for the site as well as tackling tech debt, testing and bug fixing as they came up
- Leveraged an API built by a sister Slalom team and assisted with tickets taking on some Java and API testing work

Key Project Highlight: Worked with an internet media company to help build out various websites on the Wordpress platform.

- Originally tasked with building out a series of Wordpress websites, worked with the client to also build out a template for faster and more efficient building.

Engineer (Marketing/Web Engineering) — *Slalom Consulting*

November 2017 - March 2019

Working on the Digital Experience Management team, I supported development on MarTech projects using various CMS platforms and and Salesforce Marketing Cloud

Key Project Highlight: Worked with a media company to develop a custom landing page for a major media campaign to highlight a new series on female TV and movie directors.

- Worked closely with their in-house designer to build out a Wordpress landing page to spec with their designs, using CSS and knowledge of frontend design

Production Artist — *Sesame Communications*

May 2014 - May 2017

- Designed social media assets for client sites
- Made edits to client websites using HTML and CSS

Education

DevBootcamp
Full Stack Web Development Certification

March 2017 - September 2017

Used Ruby on Rails for backend development, and Javascript, HTML, CSS for frontend development

Learned modern software team workflows such as agile development and pair programming.
